

# Muon Logbook Summary

17 – 23 September 2001

## High voltage.

[Date]

Pixels: “PCN36” & “PCN42” – offline [17]  
MDT: “MCN3” – off/on by request [18]  
PDT wire: “DW06” – trip “CX OC”, reset (beam scraping?) [19]

## Readout.

Crate **0x31** – VBD, SRQ, L2 accept not equal, reload MFC [18]  
Crate **0x32** – not responding (restart) [18]  
Crate **0x35** – errors [18]  
    – channels 10 a,b & 11 a,b added [18]  
    – taken out of run by D.Shpakov [19]  
    – not recover from “DAQ server busy” (power reset - OK) [22]  
Crate **0x36** – SRQ interrupt errors (reset) [18, 19]  
    – errors (reset) [21, 22, 23]  
Crate **0x37** – L2 busy [17]  
    – Out of Sync; Reset [18]  
Crate **0x38** – Channels 10 a,b & 11 a,b added [18]  
    – errors (reset) [21]  
Crate **0x39** – errors [17,18, 20, 22]  
Crate **0x3b** – VBD, SRQ, L2 accept not equal, reload MFC [18]  
    – errors (reset) [21, 23]  
  
Crates **16, 17, 19** – Out of Sync [21]  
Crates **14** – Disabled [21]

**Readout\_client** – restart [17]

## Runs.

Special muon runs (forward triggers) [21]  
#131798 (62794 ev-s),  
#131800 (40069 ev-s)

## Other.

“**muo\_examine**” crashed, [21]  
unable to restart **histo**: Error scanning /**tmp** directory
