

## Management structure changes in DØ

### Need for changes arises because:

1. Have to finish Run 2a detector & run experiment for many years
2. Prepare for Run 2b and start the Run 2b upgrade project
3. Time scale to complete all this: ~5-6 years. **VERY SHORT** and requires DØ to be well organized and able to make decisions.

# Management changes in DØ

(see org. chart for graphical form) H.Weerts

## Constraints:

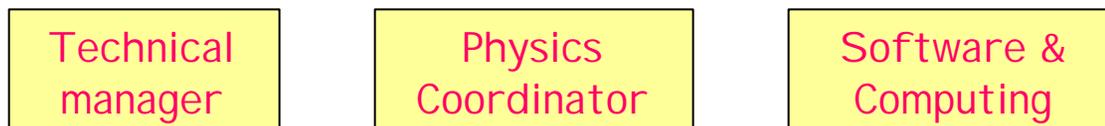

- Run 2a construction project is ending (funds mostly spent; technical manpower ramped down)
- In commissioning, going towards operations phase of experiment
- Have to start the Run 2b upgrade project ( **short time scale**)

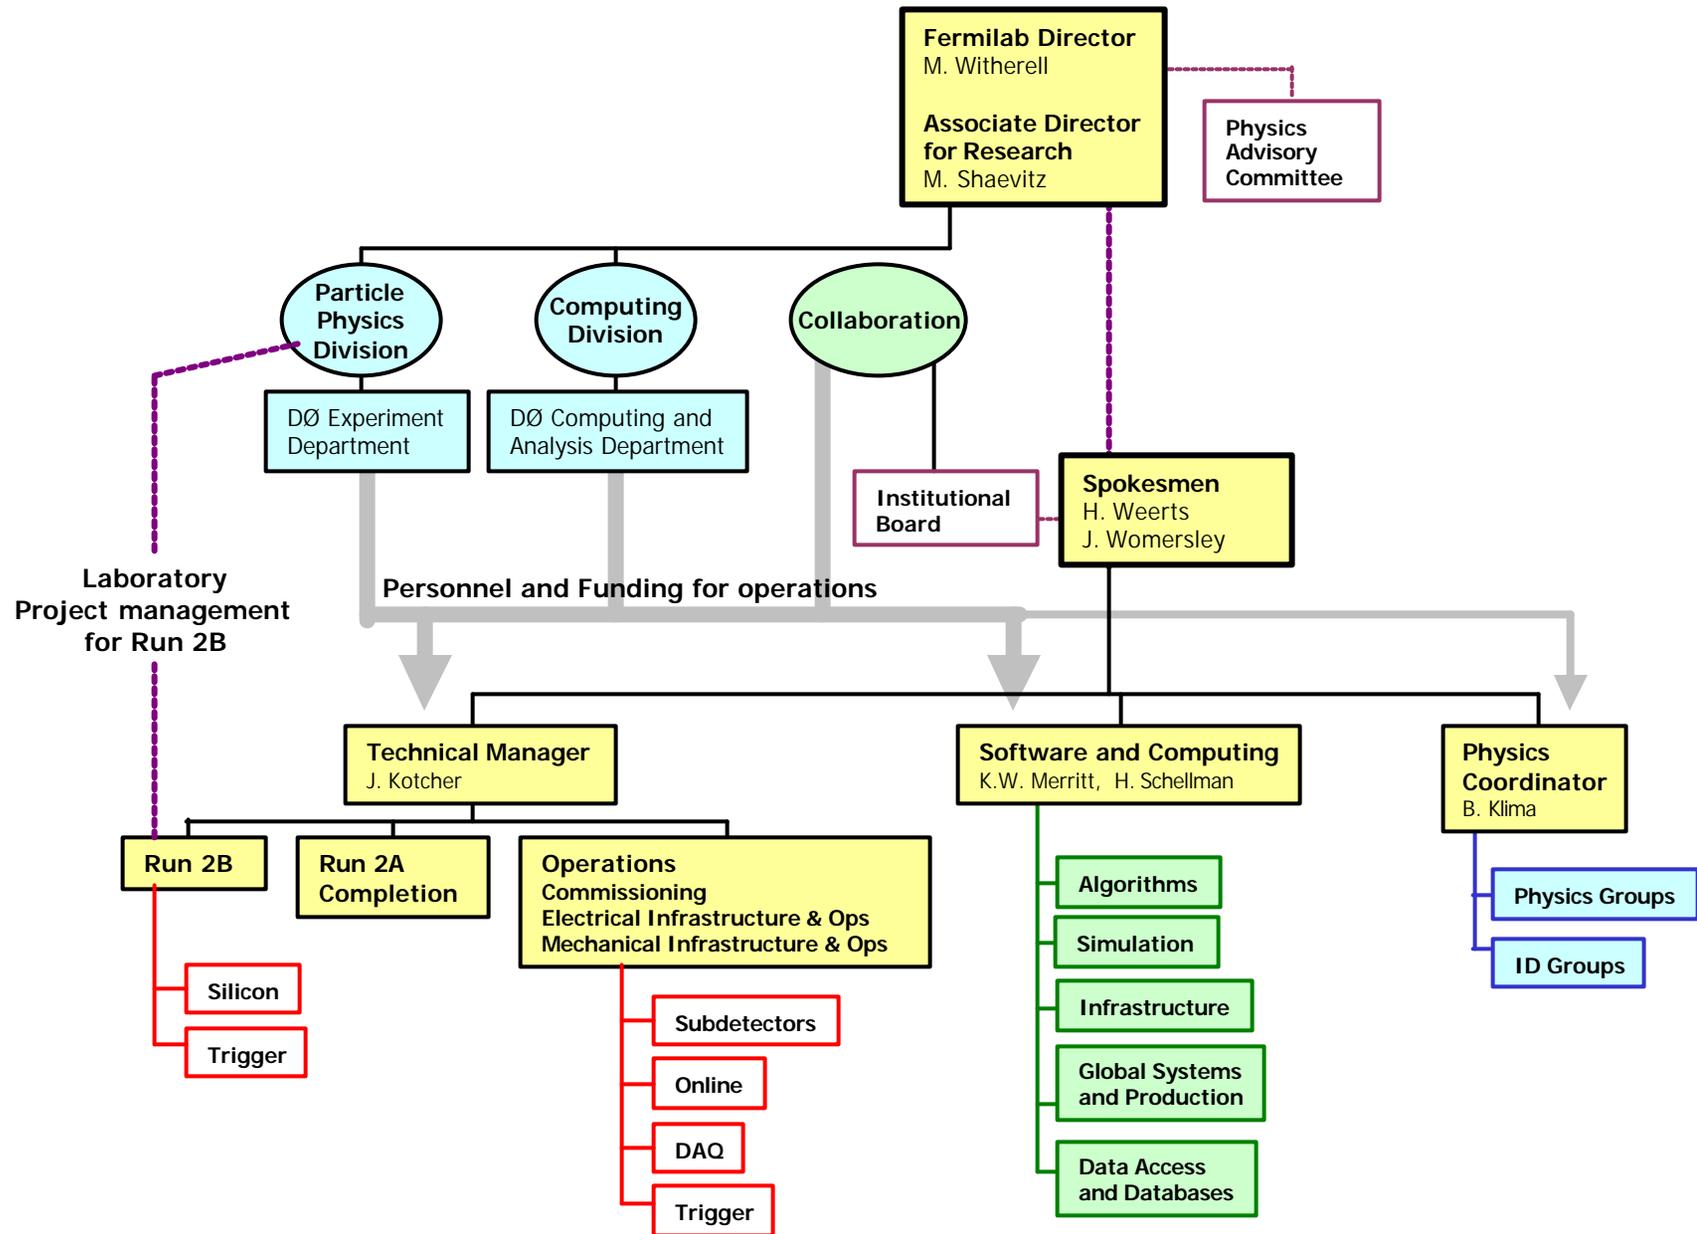

**BIG  
job**

## Concept & Underlying Idea:

- Management of **all** technical operations & projects under one person ( Technical Manager).
  - Integrate completion of Run 2a detector into this
  - Includes operation of Run 2a detector
  - Includes any and all upgrades/modifications to Run 2a detector ( SIFT chip, trigger mods. (L2beta), etc.)
  - Includes the Run 2b upgrade project ( being defined)

## Simplified Top Level management structure in experiment:

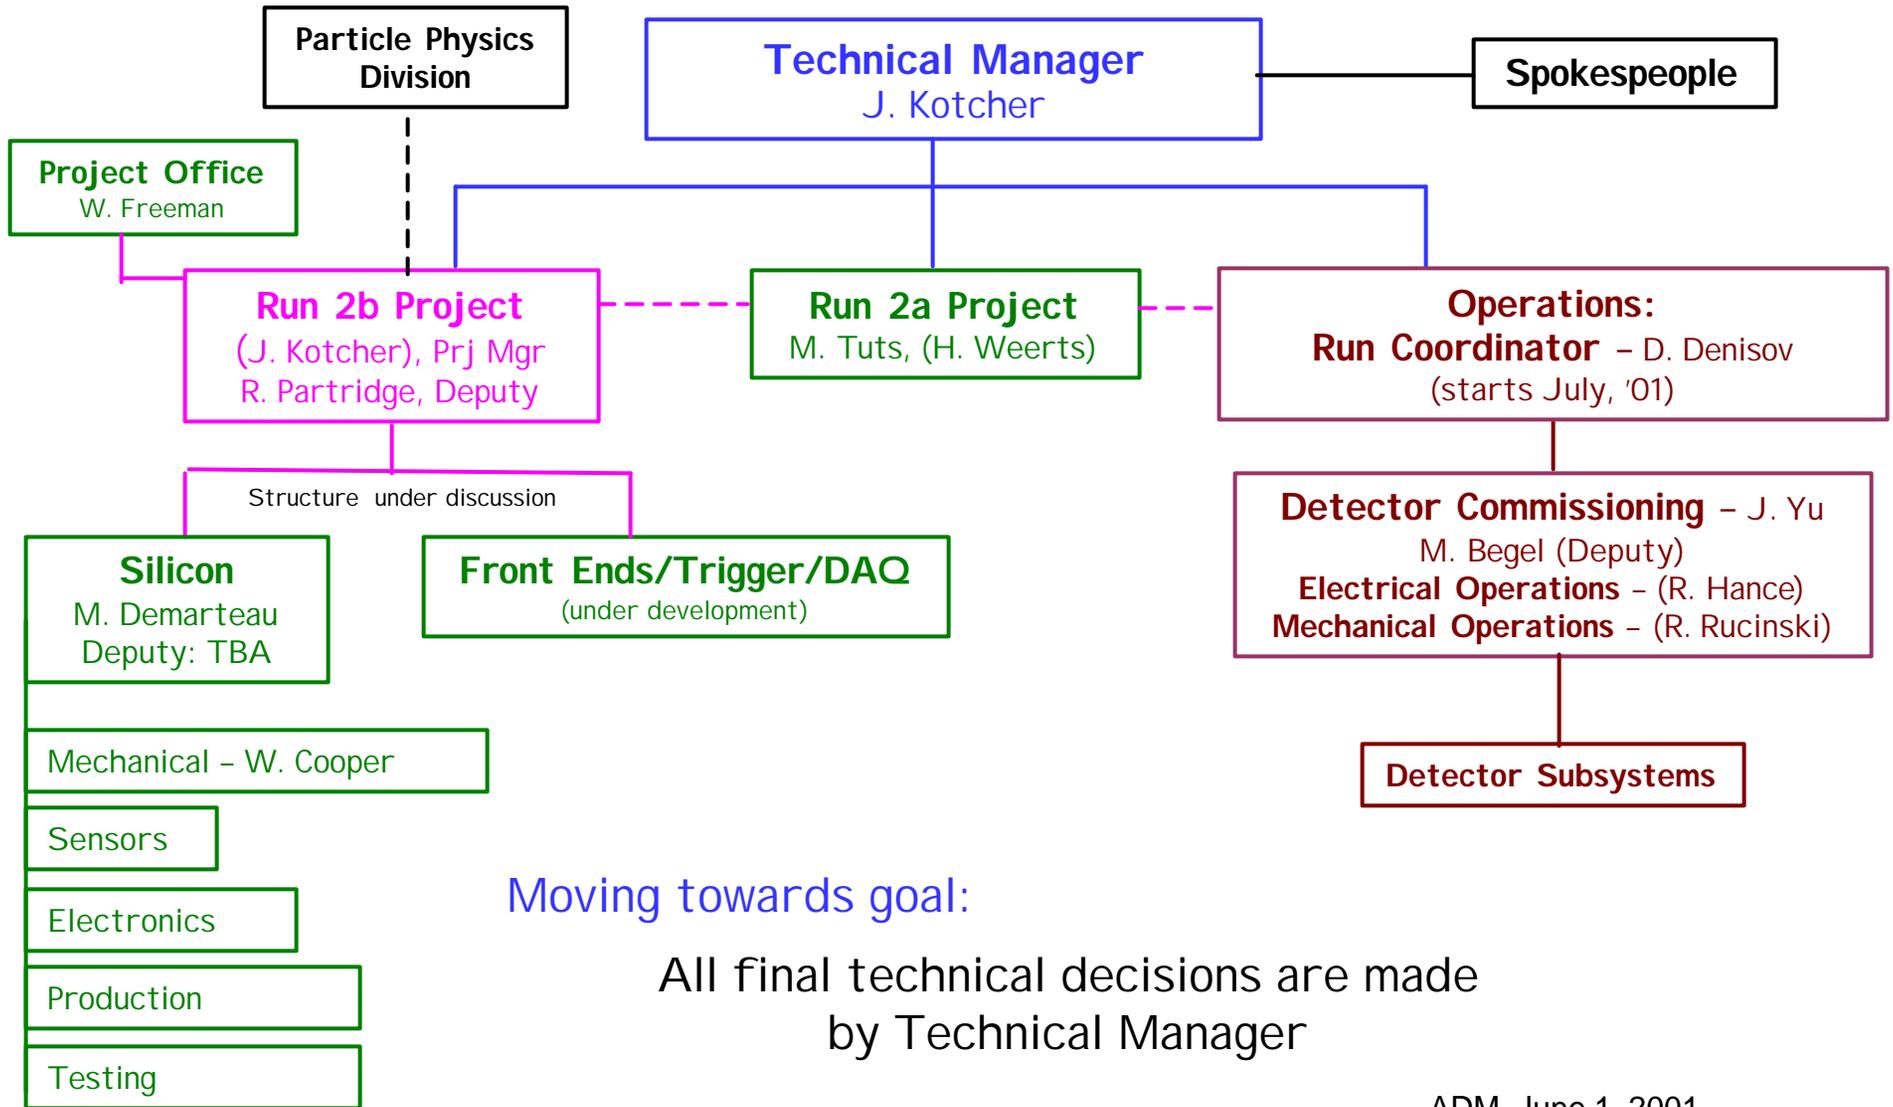

# D0 Technical Organization

Draft, 6/01/01

Moving towards goal:

All final technical decisions are made by Technical Manager
