

Status report 12/06/04

M.Weber, FNAL

Waiting for collisions or waiting for an access...

Access on Thursday:

- Work on silicon firmware
- Muon Fron-End board replacement
- Reconnecting FPD in the TeV tunnel
- More welder noise studies
- Work on fiber tracker, track trigger, L1Muon
- Checks for calorimeter

• Access on Friday:

- Replace a broken power supply for the track trigger

• Access on Saturday:

- Work on fiber tracker, L1Muon

Status

- Will be running the solenoid at 4550A (96%), assuming that the heat-load does not get much worse. Investigations continue.

- New spokesman Terry Wyatt (now - Summer 2007 +?) together with Jerry Blazey (- summer 2006 +?)
