

Status report 1/10/05

M.Weber, FNAL

Beam position

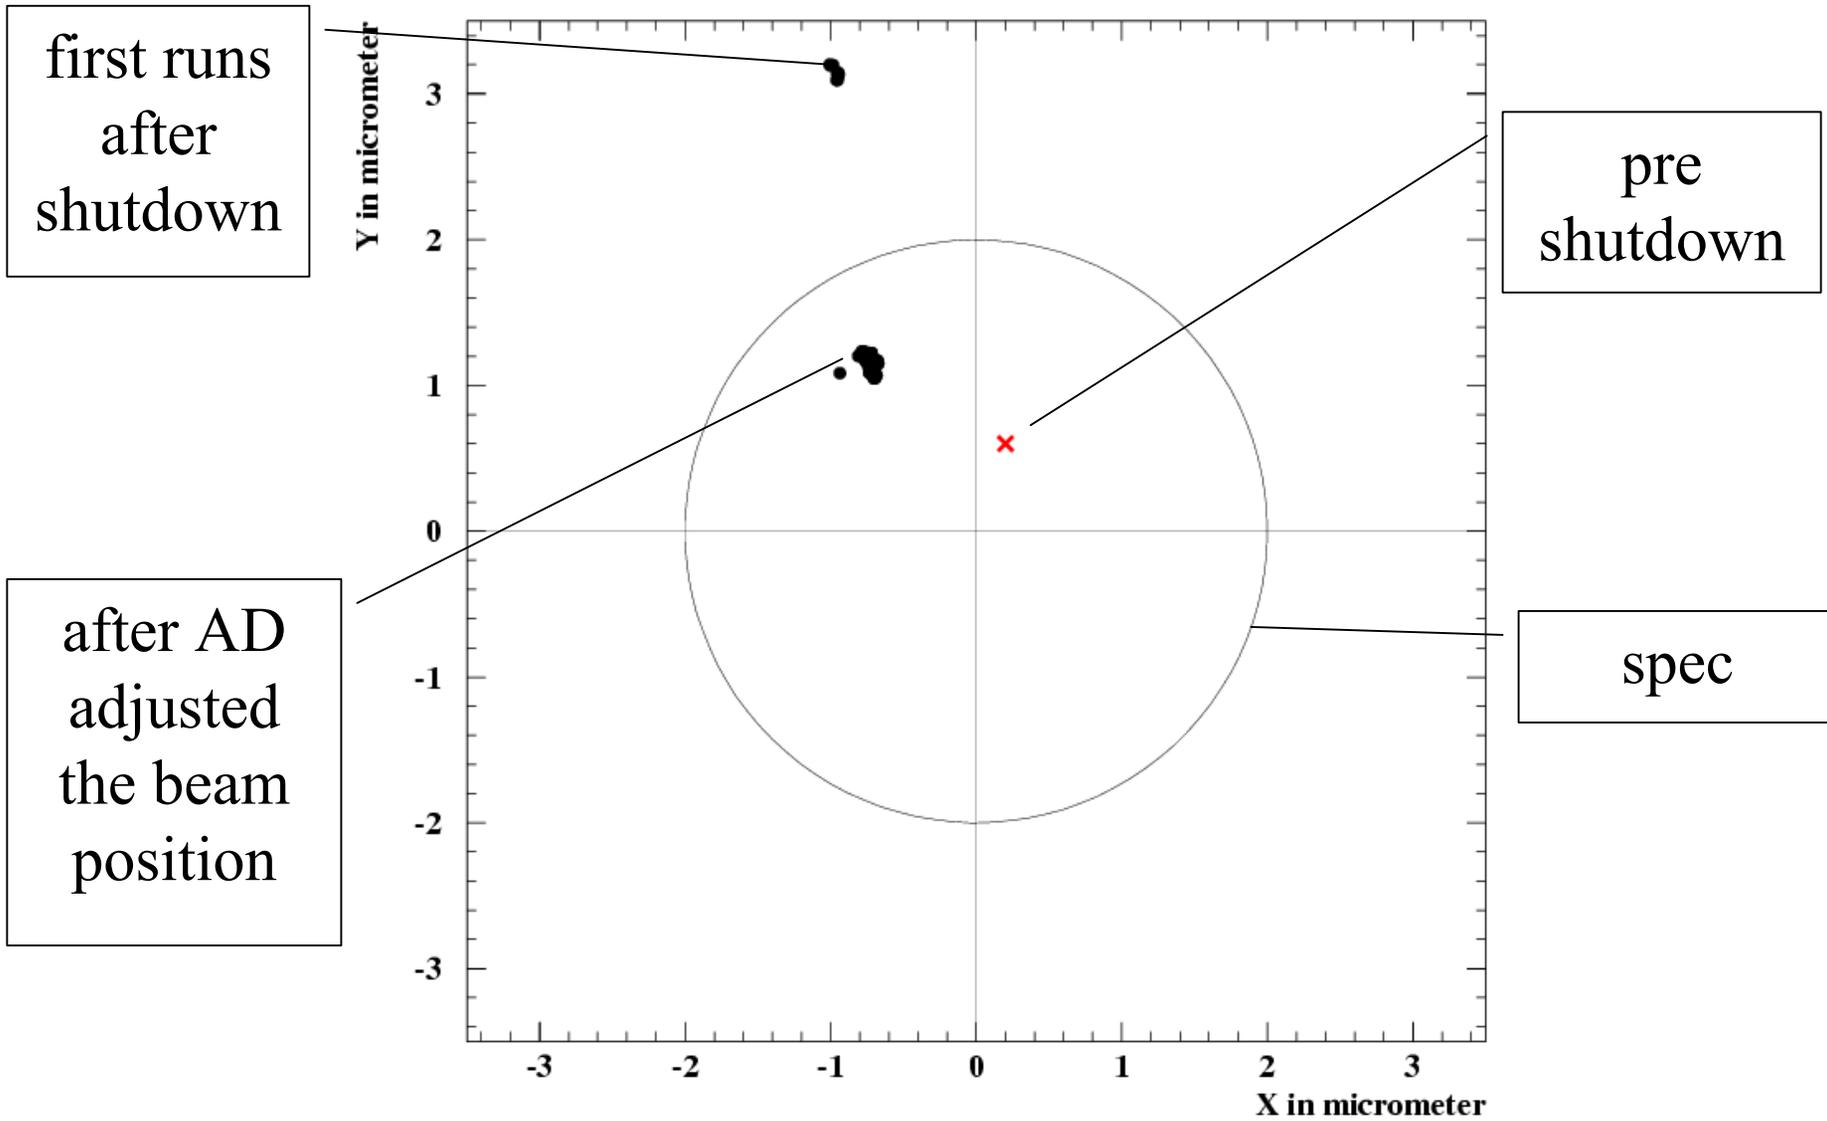

First runs after shutdown

Beam move at DZero

LowBeta move at CDF

Beamposition II

Power outage

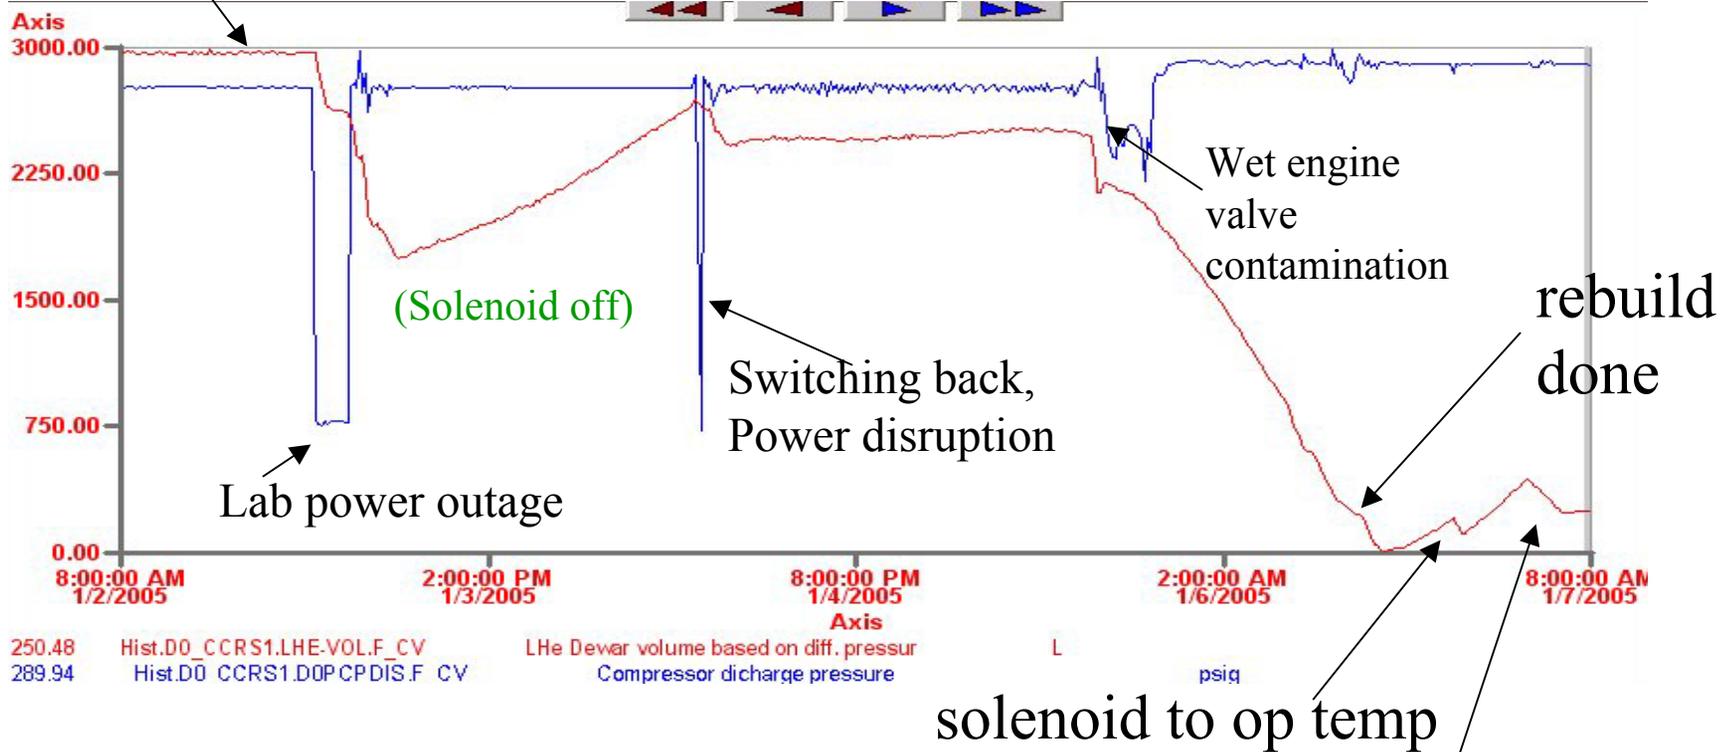

- One day to recover.
Several electronics boards, power supplies and PCs died.
- No major failure

Wet engine failure

- Lost wet engine Jan 5th evening
- Solenoid and VLPC powered down and warmed slightly
(Solenoid to 15K, VLPC to 50K).
- The repairs were done just the time we ran out of LHe

Hard week for LHe

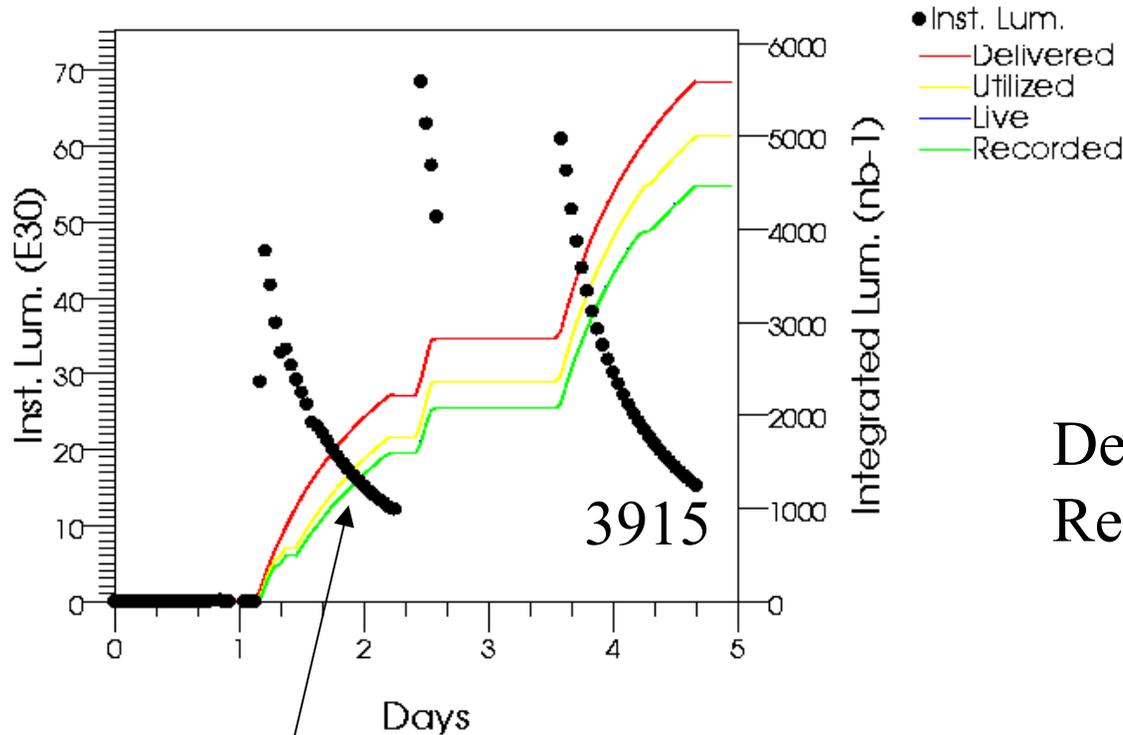

Lhe dewar level
in liter

now: ~1000 liter + 12 liter/hour

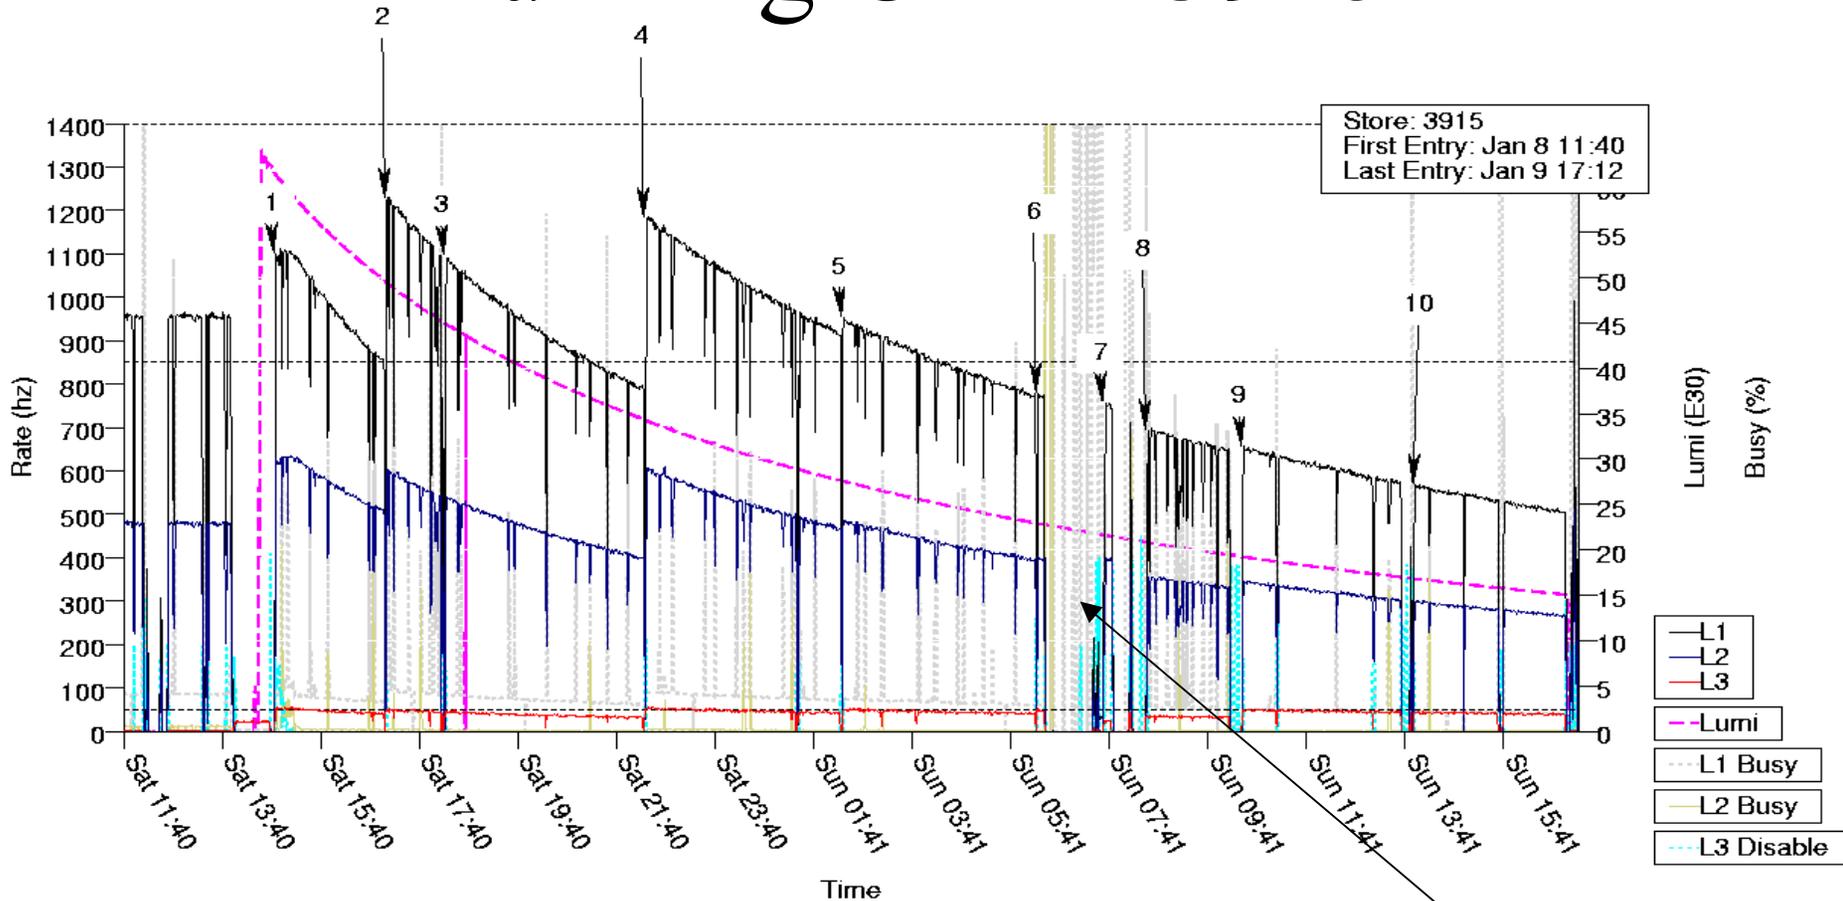

VLPC to op temp

Data taking

Delivered 5.6pb⁻¹
Recorded 4.5pb⁻¹ (80%)

Running OK in 3915

L3 is much better, thanks to 32 offline nodes installed in the online L3 farm

SMT power supply failure (outside the hall)
