

Software Infrastructure: Client/Server Framework

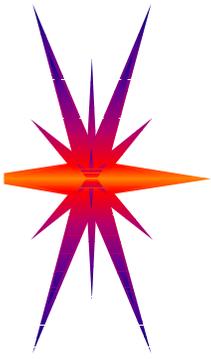

Online Meeting
30 July 1998

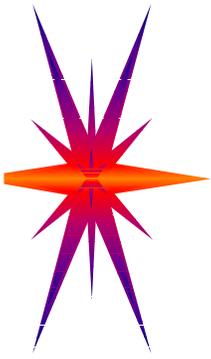

Client/Server Status

- ❖ ACE installed on d0chb and NT
 - d0ola (on-line host in the works)
 - VxWorks (delayed)
- ❖ thread_util (G. Watts)
 - package that provides thread class and thread safe utility classes (queues).
- ❖ Requirements for the framework have been written (available on WEB).

Client/Server Status (cont.)

- ❖ Design sessions with CD have been going on for several weeks
 - First level design is complete
- ❖ Test programs have been written to learn how to implement some of the low-level components required by the design
- ❖ Coding is now in progress for the first pass of the C/S framework.
 - Task has been split between CD and DØ
 - ❖ Lars Rasmussen & Dorota Genser (CD)
 - ❖ Laura Paterno (DØ)
- ❖ Aim is to have a first pass by August 15.

Design - Client
