

HistoScope Additions

Required

Easier

- Save histos in standard format file
- Overlays with normalization
- Statistical histo comparison
- Pre-configured standard multi-plot frames
- Plot comparisons within multi-plot frames
- Read and compare reference histos
- Pre-configured multi-page/multi-plot viewing and printing
- Nested configurations
- Fitting, with display and annotation
- Begin/End Run interface
- Integration with surrounding interface layer

Useful

- Flexible normalization of plots
- Improved annotation

- Allow addition of graphical items (eg arrows)
- Histo mathematical manipulation

- Limited / privileged client access
- Dynamic booking
- Extension of ntuples to disk

Harder
