

# Things we should think about...

- ***Event numbers***

- Discussed this last week, but no clear direction
- Volunteers for a committee? Should get input from:
  - *L1/L2/L3 trigger people*
  - *COOR / Logger authors*
  - *SAM (Offline) people*

- ***Who's the boss?***

- We need to build a hierarchy of dependencies among all the various Online applications
  - *Which app “comes first” (COOR?)*
  - *Where does each app get it's info?*
- Types of info:
  - *Configuration*
  - *Run*
  - *Trigger*
  - *Streams, filters*
- Suggest we start with making a list of apps, then noting what info each one needs and when
- Volunteers for another committee?
